

BRUSHED METALLIC LAMBSKIN

PRODUCT CHARACTERISTIC SHEET

PRODUCT DESCRIPTION:

Brushed Metallic Lambskin is an aniline-dyed and Hand-Rubbed lambskin leather. It is hand-rubbed with beautiful metallics that accentuate the leather's natural characteristics. This process creates unique character markings and a patina that mimics years of loving use.

CHARACTERISTICS:

Brushed Metallic Lambskin does not have the full pigmented coverage of a Finished leather hide; Aniline leathers such as Brushed Metallic Lambskin are less consistent than Finished leathers.

As an Aniline leather, natural variations in color, tone, and grain texture are part of the beauty of this natural leather and highlight each skin's unique history and natural markings.

As a Hand-Rubbed leather, there will be some variation in shading and coloration within a skin and from skin to skin.

These are small skins, averaging 9 - 11 SF in size.

A

A: Brushed Metallic Lambskin is an Aniline leather, with no surface pigments; there will be natural color shading within a skin and from skin to skin.

B

B: Brushed Metallic Lambskin is a Hand-Rubbed leather, therefore there will be some variations in coloration and boldness of the rubbing effect within a skin and from skin to skin, due to its hand-crafted nature.
